The VPI Report by Matt Vagvolgyi

The VPI report is my proprietary power index and pace analysis. The goal of the report is to give a statistical value of each horse competing in the race and relative strength in order (spread value) along with a visual analysis of pace in each segment of the race. As with any statistical analysis it should never be used independent to other forms of handicapping. The statistical analysis is designed to be complimentary and provide numeric strength to become more efficient in selecting contenders and dismissing inferior horses.

SPREAD = Numeric value rank over next placed horse

Key Spread Figures (8 Years of Data)

Spread 6pts + = 18% Wins

Spread 10 pts + = 39% Wins

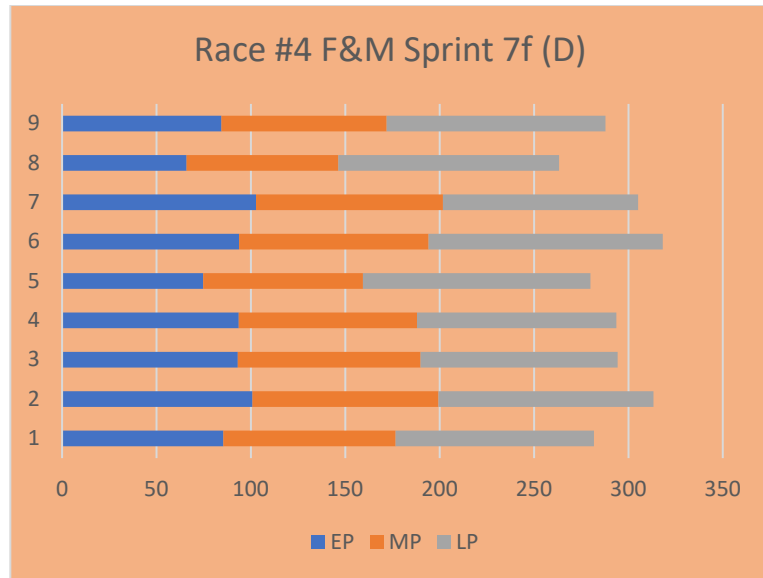

Pace Projection:

EP = Early Pace

MP = Middle pace

LP = Late Pace
